DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Hlavka on 9/11/07.

The application has been amended as follows:

- Claim 1, section (f), after the words "including at least one" add "relatively this slot and".
- Claim 4, replace "coupling portion" with "resilient portion".
- Claim 4, after the words "a plurality of" add "said".

Allowable Subject Matter

Claims 1, 2, 4-9, 12-16, 18, 19, 21 and 22 are allowed.

Regarding independent claims 1, 12, 15 and 21, the closest prior art to the instant invention is Pano (U.S. Patent No. 5,079,979). Pano teaches cutting tool assembly having tool holder (1), cutting insert (17) detachably held as well engaging the abutment walls of the insert seat (pocket) (15) of the insert holder/support member

(13). The insert support member (13) is removable held in the tool holder by clamp (2) (see figures 2 & 3). Pano also teaches insert support member (13) having a pair of insert receiving pockets at opposite ends, body portion and clamping portion (14a) joined by a resilient coupling portion (Col. 3, lines 36-42). Furthermore, Pano teaches in figure 3 an aperture spaced from insert seat/pocket (15) and each pocket including a slot segment/slit (16) extending outwardly from the aperture.

However, regarding independent claim 1, Pano fails to anticipate or make obvious the resilient coupling portion including at least one relatively thin slot member as well as a laterally extending slot extending inwardly from said aperture. Regarding independent claim 12, Pano fails to anticipate or make obvious the resilient coupling portion including plurality of relatively thin slots intermediate said slot segments (16). Regarding independent claim 15, Pano fails to anticipate or make obvious the resilient portion (i.e. deformable portion) including plurality of relatively thin slots spaced inwardly with respect to said aperture. Regarding independent claim 21, Pano fails to anticipate or make obvious the resilient coupling portion including plurality of slots including a pair of upper and lower slots associated with one of said insert receiving pockets and another pair of upper and lower slots associated with another of said insert receiving pockets.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sara Addisu at (571) 272-6082. The examiner can normally be reached on 8:30 am - 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Monica Carter can be reached on (571) 272-4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
